Re: "Chicken Littles want seismic upgrades," letter, April 26.

I am completely in agreement with the letter-writer. I am a Vic High grad and have a bias, but I am also in favour of technical upgrades as required.

I have been back to the school many times, and am always amazed (wonderfully so) at the excellent physical condition of the building. It has withstood the rigours of many students and many earthquakes over the 104 years since it was built, and the structure should not be lost because of the whims of a few bureaucrats.
