

Alumni Award for Biology

ELLA-JO SPINDLER

Dear Vic High Alumni Association,

I am honoured to have been selected for the Alumni Award for Biology and wish to thank you for your generous support. As a Grade 12 student at Vic High, I am actively engaged in various extracurricular activities, striving to make a positive impact in both my school and community. One of my passions lies in the performing arts, where I am a dedicated member of a dance group at Stages Performing Arts School. Additionally, I have taken on the responsibility of a part-time cashier job, which has taught me valuable lessons in time management, teamwork, and customer service. Beyond my commitment to personal and professional growth, I have a strong desire to contribute to the well-being of others. This is why I have chosen to volunteer with the Step Up Youth Program at the Summit Long-Term

Care Facility. By interacting with the residents, I have witnessed the transformative power of compassion and companionship in their lives, solidifying my belief in the importance of community engagement. After completing my high school education, my passion for biology, particularly anatomy, has led me to pursue a science degree at the University of British Columbia. I intend to major in biology during my second or third year, as it will provide me with a solid foundation for my future career aspirations. With my goal of becoming a veterinarian, I plan to attend veterinary school after completing my undergraduate studies, where I can combine my love for animals with my interest in biology to provide compassionate care to animals in need. Thank you for your generosity and support.

Sincerely,

EllaJo Spindler
