

Alumni Award for Mathematics

Dear Vic High Alumni Association,
I am grateful to be selected for the Alumni Award for Mathematics, and thank you immensely for your consideration and selection. My name is Etienne Allard-Shiau, and I am in the graduating class of 2023. Mathematics has always been one of my strongest subjects, and this year I have put a great deal of effort into understanding and applying the concepts taught. Thanks to the support of my teachers and peers, I was able to achieve high grades in the area this year. Particularly, I was thoroughly intrigued by Calculus 12 and am excited to continue with my studies in mathematics.

Next year, I am beginning my studies in computer science at McGill University in Montreal. While not a direct mathematics degree, it will be heavily incorporated. I have aspirations to become a software engineer, and this scholarship will help to ensure security and stability in my first months in Montreal.

Thank you again for your generosity and support.

Sincerely,
Etienne Allard-Shiau
