

## Packford Award for Technology Education

Dear Vic High Alumni Association,

I am honoured to have been awarded the Packford Award for Technology and I sincerely thank you for your decision.

Ever since middle school, I have enjoyed exploring the various trades courses. Of particular interest to me have been Electrical and Power Mechanics classes. I am especially grateful to Mr. Wheeler for his wonderful, engaging classes as well as his guidance and support during my time at Vic High. I've had the opportunity to improve my skills and to help fellow students with their studies. Over the course of my time at Vic High, I have grown to love the classes and respect the teachers. I hope that, over time, I can grow into someone who can inspire others.

After graduation, I plan to enrol in an apprenticeship program at Camosun College. My goal is to earn my ticket in the electrical trades. I look forward to a rewarding career in the trades.

Thank you again for your generosity and support.

Sincerely,  
Reed Hale
